Bonus Exercise: MobileMAN (session 1)

Deadline: 27.10.2004 at 8:15am (before the beginning of exercise lecture)

- Objective: To collaborate in the MobileMAN project by giving your ideas. Give a possible practical application for an ad hoc device product.

- Check the MobileMAN project pages for an overview:

http://cnd.iit.cnr.it/mobileMAN/index.html

- By groups (2-4), do brainstorming and submit your suggested application

    o To the collaborative web page: http://mobileman.projects.supsi.ch/

    o Or to the course mailbox (if you use paper support)

- How to sign in to the collaborative (wiki) page?

    o UserID = your HUT's e-mail username + @mobileman.supsi.ch

    Example: josep.huguet@hut.fi → josep.huguet@mobileman.supsi.ch

    o Password = your student number (with capital letter).

- One document per group. Give all names and student numbers in the document.

- Your document will be read also in Switzerland, so it must be submitted only in English.

- You can get up to 2 more exercise points.

- It's a bonus exercise: if you don't do it, doesn't decrease your grade.
