

Notes

- ▶ News group
 - For now: `opinnot.sahko.s-38.tietoverkkotekniikka`
 - Will provide dedicated newsgroup if a real need arises
 - i.e. if too much traffic
- ▶ Assignment 1
 - Test program (compiled for Sun workstations) in `~jott/nmps/bin`
 - Will be available on the web page this afternoon
- ▶ Assignment 2
 - Don't forget: RTP-Info: header(s) in PLAY response
 - Include most recent RTP sequence number and timestamp
 - Just collect from incoming media streams
 - You will need to provide this information per media stream
 - Test environment in progress
 - Will provide test binaries for Suns, PC Linux, and cygwin

SIP Material

- ▶ Slides are meant for course use only
- ▶ Will only be accessible from HUT network (130.233/16)
- ▶ Basic reading on SIP
 - Sections 1 – 7 of RFC 3261 (33 pages)
